

Luka Saxena

Luka Saxena is a Masters candidate, Research Assistant, and unapologetic spreadsheet enthusiast.

Currently completing an Master of Science in Health Data Science at UNSW while working at The George Institute for Global Health in critical care and sepsis research, Luka brings a creative and driven approach to complex health data problems. Their work spans data management, visualisation, evidence synthesis, and survey methodology, with a growing focus on translating postgraduate-level methods directly into research outputs, including publication-ready figures, national survey analyses, and manuscript contributions. At the end of 2024, Luka was recognised with the Critical Care team's Creativity Award.

Address

1/24 National St Leichhardt

Education

2026-2028

Masters of Science in Health Data Science

University of New South Wales

2023-2026

Bachelor of Advanced Science (Pre-Medicine) - HD Average

University of Technology Sydney

2021

International baccalaureate - Nov 2021 (97.3 ATAR)

Trinity Grammar School

Professional Development

- USYD CCE Tableau Course
- USYD CCE SQL Introduction
- USYD CCE Power BI Intermediate
- USYD CCE Data Visualisation
- USYD CCE Power BI Introduction
- ICH GCP Proficient (Aug 2025)

Software Proficiency

- | | |
|------------|-----------------|
| • R | • All MS Office |
| • Python | • Tableau |
| • SQL | • REDCap |
| • SAS | • Covidence |
| • Power BI | • Qualtrics |

Experience

May 2025 - Present

Research Assistant

The George Institute for Global Health

- Managed, cleaned, validated, and organised complex health and research datasets across critical care and sepsis projects (SEPSIS SUPPORT, SNAP-LFT) using **Python, R, and Excel/Power Query**; maintained data integrity and version control across multi-site pipelines.
- Conducted **systematic and scoping review** workflows in Covidence across **150+ studies**, including title/abstract screening, full-text review, structured data extraction, and quality appraisal using MMAT and RCT risk-of-bias tools; contributed directly to a peer-reviewed preprint.
- Built and maintained comparative spreadsheets, coded extraction files, and structured analytical datasets using **Excel and Power Query** to support accurate, reproducible analysis and reporting.
- Developed interactive **Power BI** dashboards, visual summaries, and reporting tools to communicate trends, project progress, and research insights to clinical and non-clinical stakeholders.
- Applied platforms including **REDCap** (advanced branching logic, action tags, piping, CSS theming), **Qualtrics**, **SharePoint**, **Power Automate**, and **Microsoft Forms** to support data capture, workflow automation, and research operations.
- Contributed to the preparation of protocols, ethics documents, governance resources, and **Statistical Analysis Plans** (SAPs), ensuring high-quality, well-documented, and audit-ready research processes.
- Coordinated meetings and **stakeholder communication** through preparation of agendas, minutes, analytical summaries, and presentation slide decks; translated complex research outputs into clear, practical materials for varied audiences.
- Maintained **project documentation** and source files to strengthen data integrity, version control, consistency, and accessibility; delivered staff training in ORCID, SharePoint, Loop, and Planner to improve team adoption of standardised workflows.

Dec 2022 - Dec 2025

Audio Visual Technician

Trinity Grammar School

- Maintained IT/AV infrastructure reliability in **time-critical operational** environments; produced clear **technical documentation** and user guides reducing support escalations.
- Managed equipment inventory records and asset **tracking systems**, applying data accuracy and version control principles transferable to **research data governance**.

Jan 2020 - Apr 2024

Waiter / Bar Tender

Cedrus Lebanese Restaurant

- Developed strong **stakeholder communication**, attention to **detail**, and **high-performance** teamwork skills in a **fast-paced** customer-facing environment.
- Built resilience, adaptability, problem-solving, and time management skills transferable to professional roles

Achievements/ Recognitions

- The George Institute for Global Health CC Awards - Creativity (Dec 2025)
- University of Technology Sydney - Science Deans Merit List for HD Average (2024)
- University of Technology Sydney - Microbiology Outstanding Research Award (2024)

Major Projects

SEPSIS SUPPORT (2025-2029)

Contributed to a national research project focused on improving post-sepsis care for survivors in Australia. Synthesised findings from a 150+ study scoping review and national health professional surveys to identify service gaps, map key model-of-care components, and support the co-design of improved follow-up care pathways. Cleaned and analysed complex datasets, generated summary outputs and visualisations, and translated findings into clear materials for stakeholder engagement and project planning.

SNAP-LFT (2025-2029)

Our research focuses on understanding the post-sepsis syndrome, a condition marked by persistent physical, psychological, cognitive, and social challenges that can significantly affect a person's quality of life. By collecting long-term follow-up data on this often-overlooked patient population, we aim to better understand the true burden of sepsis, providing crucial insights that will inform future patient care and rehabilitation strategies.
